

LIABILITY RELEASE

FRONT LOAD WASHING MACHINES

In order to be moved safely, you or a third party firm should secure the drum/agitator to prevent it from shifting while being moved. (Sugar House Moving & Storage can have a third party service come out and secure the drum/agitator with the applicable hardware kit purchased from the manufacturer). If you do not choose to secure the drum/agitator prior to your move, we will exercise reasonable care in its handling and transport.

However, we will not be responsible for damages that are the result of normal handling and the inherent nature of the front load washing machines. This includes, but is not limited to the drum/agitator and related mechanical devices.

I, _____, have read the above information and release Sugar House Moving & Storage and its agents and drivers from any and all liability for damage resulting from the transportation of front load washing machines if the damages are a result of the inherent nature of front load washing machines.
